

March 30, 2007

Prof. Chantal Buteau
Professor of Mathematics
Brock University
500 Glendridge Avenue
St. Catharines, L2S 3A1

Dear Employer:

This is in response to your recent request for a letter of recommendation for Kaan Ersan who worked for me up until 8 months ago.

Kaan Ersan worked under my direct supervision at the Mathematics Department for a period of 8 months ending in April 2007. During that period, I had great pleasure working with him without any communication problems. He is reliable and gets the work done quick and even. Setting up a work schedule or reaching him whenever he is needed was really trouble-free. That was the last position he held before the summer and the job was completed.

Kaan is a hard-working self-starter who invariably understands exactly what a project is all about from the outset, and how to get it done quickly and effectively. During his two semesters in the Math department research assistant position, I cannot remember an instance in which he missed a major deadline.

Mr. Ersan is a resourceful, creative, and solution-oriented person who was frequently able to come up with new and innovative approaches to his assigned projects. He functioned well as a team leader when required, and he also worked effectively as a team member under the direction of other team leaders.

On the interpersonal side, Kaan has superior written and verbal communication skills. He gets along extremely well with staff under his supervision, as well as colleagues at his own level. He is highly respected, as both a person and a professional, by colleagues, employees, suppliers, and customers alike.

When Mr. Ersan announced his resignation to take up a new position with a larger company, we were saddened to see him leave, although we wished him the greatest success in his new undertaking. Even now, after his departure, I can state that his presence, both as a person and as an exemplary employee, is still missed here.

In closing, as detailed above, based on my experience working with him, I can unreservedly recommend Kaan Ersan to you for any Research Assistant/Data Entry position. If you would like further elaboration, feel free to call me at (905) 688-5550 ext. 3167.

Sincerely,

Prof. Chantal Buteau
Professor of Mathematics
